

Winter is in Bloom

Don't let the snow and cold fool you—your garden could still be a haven for life and beauty during the winter months! Looking out from the warmth of your home, your views could become a new source of magic and wonder.

Embrace the quiet beauty of winter:

Witness the delicate frost that sparkles in the sunshine as it lines the branches,

Admire the vibrant green needles of an old pine as they poke through a fresh blanket of snow,

Discover brilliant red berries that pop with color and provide sustenance for a visiting cardinal.

What garden sights and sounds might warm your heart this winter?
